

CP 2.7 Processing of Initial Negative Results

General Information:

Negative screens do not appear as headline cases in SIS. However, if a baby with a negative screen is reported to the Program by a PCP or specialist as having (or suspected of having) a screened-for disorder, the case can be made a headline case if further follow-up or tracking is indicated.

PROTOCOL:

Resp. Person	ACTION
NAPS Labs	<ul style="list-style-type: none">• Scans TRF or enters demographics manually into SIS.• Processes and tests specimen.
SIS	<ul style="list-style-type: none">• After initial negative results are posted in SIS sends Result Mailer to primary care physician and to hospital where specimen was collected.• Automatically closes case in SIS.
